Is it possible to only install Word or Excel instead of the entire 365 suite?

I just upgraded to 365 Business Premium so that I can access the Office products on my other computers. However, on my travel laptop I really only want to be able to use Word & Excel (online or offline). Any of the other products I would only need while online. Is it possible to only install certain parts of the Office package? It was not given as an option when I installed on my desktop.

Hi ZagFan93,

Please follow the steps below to check the outcome:

We cannot directly install only Word and Excel applications from the Office 365 portal. We can only install the entire Office suite from the portal. However, we can achieve it via the Office Deployment Tool. For detailed steps, please refer to the following methods:

1. [Uninstall Office from your computer.](#)
2. Download and install [Office Deployment Tool](#) (Office 2016 version).
3. Open the configuration.xml file and replace the original content with the following text:

=====

```
<Configuration>
<Add OfficeClientEdition="32" >
  <Product ID="O365BusinessRetail">
    <Language ID="en-us" />
    <ExcludeApp ID="Lync" />
    <ExcludeApp ID="OneNote" />
    <ExcludeApp ID="Outlook" />
    <ExcludeApp ID="PowerPoint" />
    <ExcludeApp ID="Publisher" />
    <ExcludeApp ID="Groove" />
    <ExcludeApp ID="OneDrive" />
  </Product>
</Add>
</Configuration>
```

=====

Note: If you'd like 64 version of Office, you can replace 32 with 64.

4. Press **Windows + R** keys and input **cmd** to run the cmd.exe as an administrator.
5. Navigate to the folder which is used to place **the** Office Deployment Tool.
6. Use the following command to download and install Office 2016:

Setup.exe /download

Setup.exe/configure

```
C:\Users\Administrator>cd C:\Users\Administrator\Desktop\New folder
C:\Users\Administrator\Desktop\New folder>Setup.exe /download
C:\Users\Administrator\Desktop\New folder>Setup.exe /configure_
```

Let us know the updates at your convenience.
